Claims 1-10 are pending.

Claim Rejections - 35 USC § 112

Claims 2,4,5 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims, 2,4,5 and 8, the word "preferably" is indefinite because it is unclear whether the narrower range or limitation is restrictive to the broader range, and also claim 4 is unclear as it contains subject matter which is defined by a result to be achieved. Clarification is requested.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3,5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over document WO 99 12530 A.

The document discloses absorbent articles which comprises a topsheet, a backsheet and an absorbent core therebetween, a skin care zone which is provided with a skin care composition. The document discloses an acquisition zone. The document discloses that the article comprises regions with greater or less amounts of

Art Unit: 1615

composition (lower average basis weight zones). The document may also comprise three regions, side panels (flaps), wherein each region may have the skin care composition in adequate amounts (see abstract, page 7, paragraphs 2 and 3, page 19, paragraph 2, page 22, paragraph 2, page 23, lines 3-5, page 26, lines 9-14, page 29, line 4, paragraph 31, paragraph 2, page 32, paragraphs 1 and 3, page 33, paragraph 3, page 34, paragraph 3, see claims 1,5,18-23,25-28).

The document does not teach the particular size (i.e. the width and the length) of the acquisition zone.

However, the document discloses that the size may be varied to accommodate the wearer (page 23, lines 1-10).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teachings of the WO' document. One having ordinary skill in the art would have been motivated to prepare the composition of the WO' document which comprises an absorbent article having an acquisition zone and a skin care zone.

The expected result would be an absorbent article comprising a topsheet, a backsheet and an absorbent core.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
